

New Study Intake Form

Please indicate which divisions will be involved in this project (check all that apply)

Anatomic Pathology Hematopathology Clinical Pathology Molecular Experimental Computational Imaging Core

Project Title

Principal Investigator

Please provide 3 most recent representative publications

Research Team

Please provide names of Co-investigators with 3 most recent representative publications for each (if applicable)

Hypothesis

(One sentence)

Background

Primary Objective

Express each objective as a statement of purpose (e.g., to assess, to determine, to compare, to evaluate) and include the general purpose (e.g., efficacy, diagnostic, effectiveness) and/or specific purpose

Secondary Objectives

The secondary objective(s) are goals that will provide further information on the use of the intervention, test or diagnostic approach. Express each objective as a statement of purpose (e.g., to assess, to determine, to compare, to evaluate) and include the general purpose and/or specific purpose

Novelty and Impact

Please also describe the significance of the research and the unmet needs it addresses

Study Description / Method

Provide a description of the protocol and an overview of the study design and approach

Study Population

Include a brief description such as health status or primary diagnosis (2-3 sentences)

Sample Size

N= (If more than one cohort also indicate sample size per cohort)

Study Duration

Projected end date for the completion of the study (including data analysis and manuscript submission) (1 sentence)

Expected Results

(2-3 sentences)

Plan for Publication

Include targeted journal(s)

Plan for Grant Submission

Include extramural grant targeted (if applicable)

Budget Details / Departmental Resources Requested**Funding**

Total amount requested

\$_____
